WHY KLUTHE?

Kluthe trusts in innovation. We develop, manufacture, and distribute products for tank and bulk container cleaning. These are used for internal and external cleaning of e.g. tankers and containers. We recommend our customers to use cleaning agents without hydrogen fluoride (hydrofluoric acid/HF). Our focus is on the sustainable optimization of our products, services and production processes.

ADVANTAGES

- Extensive experience with the current requirements for tank cleaning, also in the food and chemical industries
- Certified according to ISO 9001 and 14000
- Problem-solving skills
- Outstanding support provided by the sales and technical team
- Partnership, member of ATCN (Association of Tank Cleaning Companies in the Netherlands)

INTERNAL CLEANING

Alkaline stainless steel cleaner

- ▶ Suitable for the removal of mineral oils as well as vegetable oils and greases. Approved for food tankers.

Acid cleaner

- ▶ Suitable for the removal of lime deposits and fatty acids. Approved for food tankers.

Latex remover

- ▶ Suitable for the removal of latexes of all kinds from tankers and containers. Used heated for circulation cleaning. Available with or without amines.

Resin remover

- ▶ Suitable as a solvent for a wide range of resins. Not dilutable with water.

Degreaser

- ▶ Degreaser with mild odor. Excellent oil- and grease-dissolving properties for vegetable, animal and mineral oils and greases.

EXTERNAL CLEANING

Cement residue remover

- ▶ For use in washing facilities for the removal of atmospheric dirt in and on tankers and containers. Available in slightly and highly foaming variations.

Truck cleaner

- ▶ Mild-alkaline, highly concentrated, and very effective cleaning concentrate. Fully dilutable with water. Available in slightly and highly foaming variations.

Adhesive remover

- ▶ Removal paste for easy removal of glue residue, old labels and stickers. Available without amines.

Airfresh

- ▶ Neutralizes unpleasant odors and leaves a pleasantly fresh scent. Suitable for manual and machine application.
